Subject: Baylands

Dear councilmembers,

I wish to express our enthusiastic support for the Renewable Energy Alternative as recommended by the Planning Commission. We have always preferred using the Baylands for an extensive renewable energy farm. But now that Trump and the Republicans will be exacerbating climate change through epa cutbacks, elimination of existing protections, and etc, local efforts to slow down climate change will have to be stepped up, such as a 100 acre solar farm, for starters. Please support the Planning Commission's recommendation. We are sending this in response to Anja Miller's email. Thank goodness for her concern and efforts.
