Subject: input on Brisbane Baylands
Reply-To: yvonne lee healy

Dear Brisbane City Council,

I am writing to express, on the public record, my support for maintaining the current General Plan policies for the Brisbane Baylands. My primary reason for opposing residential development is the toxicity, not only at the site itself but also from the adjacent former dump/current soil processing operation. I feel it would be unconscionable to permit residential development and allow people, especially children, to live there and be exposed to that level of toxicity.

Thank you.

Sincerely,
Yvonne L Healy
