Subject: Support the Renewable Energy Alternative for the Baylands

As a resident of Brisbane, I am writing to voice my support for the Renewable Energy Alternative for the Baylands project. My main concern regarding any development is that it would increase traffic problems for the city and the Bay Area as a whole. As it is, commuting up and down Highway 101 is sometimes a nightmare. Imagine what would happen if the Baylands had housing and other major businesses on the site. Additionally, it is understood the land is highly toxic; therefore, people should not be living or working there.

The Renewable Energy Alternative is the best available option because it is consistent with the city's General Plan as well as the community's commitment to sustainability and the environment. Thus, I urge this Commission to support this plan.

Sincerely,

Mike Zammit
