

Dana Dillworth

Occupation: High School Instructor

I am running for city council because Brisbane is a jewel. I am going to tell you about myself because I am asking for your vote.

My husband and I purchased a modest home here in 1988. My employer located here, in Crocker Park. We have a son who is now grown.

Here is what I have done in the last thirty years:

-In 1991, in association with Mountain Watch, I researched the endangerment orders on Baylands properties and helped create the legal argument for better protection. The City of Brisbane was required to create an updated General Plan to respond to health and safety issues.

-I petitioned the state Department of Toxic Substances Control to create the Brisbane Baylands Community Advisory Group which reviews and comments on testing, plans and regulation of multiple toxic sites impacting San Francisco, Daly City, and Brisbane.

-I reviewed nearly every page and attachment of the Draft EIR for the Baylands project as a member of the Citizen's Committee.

-Volunteered teaching art at BES when the school district defunded the arts.

What I propose to do is:

-Carry out the citizen's recommendation, which is the Planning Commission's recommendation for the Baylands. (No housing, Net Zero energy, limited periods for exposure to toxics.)

-Get our General Plan updated.

-Develop more opportunities for seniors.

-Increase our grant-writing to get projects moving.

-Tend to other matters like our streets and irregular sidewalks.

Our town needs to regain balance. I will work fully in the Public's interest.

A vote for me is a vote for Brisbane.
