

City of Brisbane Construction and Demolition Debris Recycling and Waste Reduction Plan

This form is to be completed for all demolition, remodel, re-roofing and new construction projects covered by Ordinance No. 493. Covered projects include:

- 1) Demolition of structures or portions of structures larger than 200 square feet
- 2) Re-roofing of an existing structure involving an area greater than 500 square feet
- 3) Renovation, remodel or addition to an existing structure or the construction of a new structure where the value of the work exceeds \$75,000.

The Ordinance requires that the applicant complete this Recycling and Waste Reduction Plan form prior to the issuance of a permit and the commencement of work. Please submit this form with your permit application. Construction and demolition waste recycling information is available at the City of Brisbane Building Department.

*Eight pounds per square foot is an industry standard estimate of waste generated from new construction.

**Remodel waste calculations range from 2 lb/sq. ft. to 10 lb/sq. ft depending on the nature of the project. For example, projects involving removing or stripping of walls and floor coverings will be estimated at the high end of the range. Consult with the City of Brisbane Bldg Dept for the appropriate calculation.
