2016 Tide Tables are here!

The initial work began with the Dock 2 **fairway**, then the slips on the North side of the South finger were dredged. At this writing, the entire North side of the North finger of dock 2 and fairway between docks 2 and 3 is being dredged. Owners whose boats are “next up” for movement will be contacted and assigned a TEMPORARY SLIP until the sediment in their area has been removed. The exact turnaround time for return to “home” slips is unknown, but we will know more specifically as the work proceeds. We anticipate a 3-4 day notice on movements– and you will be **expected to move**, or **to arrange for movement of, *your own boat***. **To prevent thefts, please take EVERYTHING with you– leave behind no power cables, adapters, hoses, etc.** We will contact you when it is your turn to move.

- If you are out of the area and unable to move your own boat, or it won't run due to mechanical issues and you cannot arrange your own tow that can be ready on short notice, **or if we cannot contact you**, or you don't respond in a timely manner – the **dredgers will be directed to move your boat**. The City is providing this service for those we cannot contact or those who cannot make their own movement arrangements at the direct cost (no city mark-up) of **\$500 per hour**. Towing will be accomplished by the dredge crews with their work boats. The movements and transit times will be carefully tracked and you will be billed on a future monthly statement. The movement time for each vessel will be slightly different depending on factors such as location of temporary slip, tides, size of vessel, etc.

The dredgers (**contact them if in transit**– in or outbound- on Marine **channel 80**) will ultimately move North to Dock 6. Going forward, each dock finger will be emptied sequentially, divided in half– i.e., both sides of the East end will be emptied, then both sides (North & South together) of the West end will be dredged. All vessels on both sides of a given finger will move in this sequence until the end of the project. Work hours are 7 AM to 7PM, M-F and 9 AM-7PM on weekends & holidays. They will shut down at 4:30 on Tuesdays during the BEER CAN RACING season.

Weekly dredge updates will be posted on all dock gates and online here:
<http://www.ci.brisbane.ca.us/special-dredge-updates>

Remember to update us by calling with your cell phone and email if we do not have your most current information. My door is always open to you. If you have a question but cannot come in, give me a call or send an email.

Michael Hahn
Harbormaster

Welcome Back!

We are happy to welcome Minoru Nagayoshi from Dock 6 back to the Marina after his one year adventure singlehandedly sailing the South Pacific. His travels included stops at Nuku Hiva, Moorea, Bora Bora, Aitutaki, and Fanning.

Ever the practical sailor, Minoru began planning his odyssey when he bought his 30' Norseja 8 years ago with the dream to see different parts and cultures of the world. Here are some snippets of advice from this intrepid sailor:

- *Good planning and preparation are the key to success— study and know your destinations*
- *Long anchor chains of at least 150' are critical in the South Pacific due to coral reefs—nylon anchor rope simply will not work*
- *To prevent infections from the inevitable cuts and bruises, keep your immune system healthy and bring Vitamin C, zinc, and multi-vitamins*
- *Bring moist wipes as showers will be infrequent— Minoru likes the Kirkland brand from Costco*

Most importantly—keep your dream alive!
