Councilmembers discussed conducting a charrette to study land use and design for Crocker Industrial Park and the Brisbane Village area, studying the viability of employing an Economic Development Professional, and creating an Economic Development Action Plan.

It was the consensus of the Council to have the Council Subcommittee take the feedback given so far and work with staff to prepare a spreadsheet that would determine which economic development goals could be completed under short and long term timelines.

Council also discussed looking at the viability of hiring an economic development professional when considering the upcoming budget deliberations and of the possibility of forming a Citizens Economic Development Committee.

B. Receive information on a potential Crocker Industrial Park and Brisbane Village charrette and give direction to staff

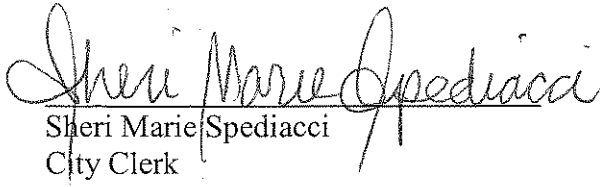

Community Development Director Swiecki gave further information about the costs and scope of a design charrette conducted by the American Institute of Architects (AIA).

After Councilmember clarification and discussion, direction was given to invite AIA to a future Council meeting to give a presentation of how a charrette would be organized and conducted.
