SECTION 4: Section 17.12.050 - Density transfer in Chapter 17.12 – R-BA Brisbane Acres Residential District of the Municipal Code is amended to read as follows:

17.12.050 - Density transfer.

- A. In order to facilitate preservation of lands in the R-BA district with significant environmental resources, one or more additional dwelling units within the R-BA district, in addition to the dwelling unit otherwise permitted on a particular site, may be constructed under the conditions set forth in this Section 17.12.050. As used herein, the additional dwelling units are called "transfer units." The density transfer shall comply with all of the following requirements:
 - 1. One transfer unit may be allocated to the site receiving the density transfer for each twenty thousand (20,000) square feet of land of the total area of the site or sites from which the transfer units are taken which is permanently dedicated to open space. No transfer units shall be allocated for any remaining portion less than twenty thousand (20,000) square feet. The method of retaining the dedicated land in permanent open space shall be approved by the city council upon recommendation of the planning commission and shall be implemented before any building or grading permit is issued for development on the site receiving the transfer units. Where dedicated open space is proposed to remain in private ownership, the applicant

and property owner shall execute an agreement with the city for the continued maintenance of the open space, to be recorded with the county of San Mateo prior to issuance of any grading or building permits.

2. The site from which the transfer units are taken must be found to have value as open space based upon one or more of the following considerations:
 - a. Contiguous with San Bruno Mountain State and County Park;
 - b. Contains intact native vegetation;
 - c. Contains endangered butterfly habitat;
 - d. Contains permanent or semi-permanent wetlands;
 - e. Forms a portion of a significant watercourse;
 - f. Does not adjoin developed parcels on more than one side.

In making this determination, the planning commission and the city council shall be guided by the city's open space plan. The density transfer value of undeveloped "paper streets" in the upper Brisbane Acres may be recognized, once it is established that they are not subject to claims of access rights by easement or necessity from any remaining private property owners in the upper Brisbane Acres.

3. The site receiving the transfer units must be found suitable for development with increased density based on all of the following considerations:
 - a. Has a total area of not less than twenty thousand (20,000) square feet;
 - b. Does not contain any of the features of value for open space as described in subsections (A)(2)(a) through (A)(2)(e) of this section;
 - c. Is adjacent to or relatively near existing development and infrastructure.
 4. The type of development permitted on the site receiving the transfer units shall be single-family dwellings only, or single-family dwellings with accessory dwelling units consistent with the provisions of Chapter 17.43 of this Title. The site shall be subdivided into lots with a minimum lot area of five thousand (5,000) square feet subject to the maximum density permitted per Sections 17.12.040(A), 17.12.040(B) and 17.12.050(A)(1).
- B. A use permit granted by the city council shall be required for all density transfers pursuant to this section. The use permit shall first be considered by the planning commission which shall make its recommendation to the city council. In addition to the findings for issuance of a use permit prescribed by Section 17.40.060 of this title, the approving authority shall find and determine that:
1. The transfer units will be sited, designed and constructed to avoid adverse effects upon environmentally sensitive areas both on and off site, such as disturbance of watercourses and hazardous geologic conditions;
 2. The site receiving the transfer units will be served by infrastructure that meets city standards, as determined by the director of public works;
 3. The site receiving the transfer units will have adequate parking and vehicular circulation; and
 4. The proposed development of the site receiving the transfer units will be compatible with adjacent and nearby development and is designed to minimize its visual impact.

If the density transfer requires any other permits or discretionary approvals, except for the design permit required by Section 17.12.050(C), the applications for such permits or approvals shall be filed and processed concurrently with the application for the density transfer use permit.

- C. As a condition of approval of the use permit referred to in Section 17.12.050(B), a design permit shall be required for any density transfer.

SECTION 5: Section 17.12.055 - Clustered development in Chapter 17.12 – R-BA Brisbane Acres Residential District of the Municipal Code is amended to read as follows:

17.12.055 - Clustered development.

- A. Consistent with the San Bruno Mountain Area Habitat Conservation Plan's goal of protecting forty percent (40%) of the Brisbane Acres as conserved habitat, adjustments to the minimum lot area, lot width and lot depth standards referred in Section 17.12.040(C) may be granted under the conditions set forth in this Section 17.12.055.
 - 1. One single-family dwelling shall be permitted for each twenty thousand (20,000) square feet of the total area of the site. Accessory dwelling units consistent with the provisions of Chapter 17.43 of this Title shall be permitted for each single-family dwelling. Permitted units shall not be clustered as multiple-family dwellings.
 - 2. A minimum of forty percent (40%) of the total area of the site shall be permanently dedicated as conserved habitat. The method of retaining the dedicated land as conserved habitat shall be approved by the city council upon recommendation of the planning commission and shall be implemented before any building or grading permit is issued for development on the site receiving the transfer units. Where dedicated land is proposed to remain in private ownership, the applicant and property owner shall execute an agreement with the city for the continued maintenance of the conserved habitat, to be recorded with the county of San Mateo prior to issuance of any grading or building permits.
 - 3. The site shall be subdivided into lots no less than five thousand (5,000) square feet in area. Street right-of-way shall be provided in compliance with city standards.
 - 4. No clustered development shall be allowed on any site less than forty thousand (40,000) square feet in area.
- B. A use permit granted by the city council shall be required for all clustered developments pursuant to this section. The use permit shall first be considered by the planning commission which shall make its recommendation to the city council. In addition to the findings for issuance of a use permit prescribed by Section 17.40.060 of this title, the approving authority shall find and determine that:
 - 1. The units in the clustered development will be sited, designed and constructed to avoid adverse effects upon environmentally sensitive areas both on and off site, such as disturbance of watercourses and hazardous geologic conditions;
 - 2. The units in the clustered development will be sited adjacent to or relatively near existing infrastructure, and extension of such infrastructure to serve the clustered development will meet city standards, as determined by the director of public works;
 - 3. The clustered development will have adequate parking and vehicular circulation; and
 - 4. The clustered development will be compatible with adjacent and nearby development and is designed to minimize its visual impact.

5. The use permit will be subject to such conditions as will assure that native vegetation is satisfactorily provided, improved and/or maintained within the area dedicated as conserved habitat.

Applications for subdivision and any other permits or discretionary approvals, except for the design permit required by Section 17.12.055(C), shall be filed and processed concurrently with the application for the clustered development use permit.

- C. As a condition of approval of the use permit referred to in Section 17.12.055(B), a design permit shall be required for the units in any clustered development.
