2016 Tide Tables are here!

IT IS DONE!

The entire dredge within the Marina has been completed, with the final areas around Dock 6 to be surveyed and confirmed for acceptance.

THANKS for all your patience and cooperation!

All boat movements were accomplished with only a minimum of fuss, and most of the boats that required an assist were moved with the help of Michael Lael and his crew, or by the Dutra dredge team. New replacement piles will be installed in our navigational channel by the end of November

If **your boat does not run**, remember to let us know when it DOES, so we can verify the important “seaworthiness” requirement as written in the berth license agreement.

Going forward, the maintenance crew will continue the dock upgrade and repair project and will finish on Dock 6, then will focus on Dock 2 for the remaining repairs. New numbers have been ordered for each slip and will be installed as soon as possible. We are also seeking bids for important repairs to the South area public restrooms.

I will request that the WiFi installers return to test the signal strength so that we have the best possible signal strength and area coverage possible.

Pigeon and rat trapping programs continue— **PLEASE do not disrupt or touch traps!**

We welcome your ideas and comments— stop by anytime, our door is always open!

Michael Hahn
Harbormaster

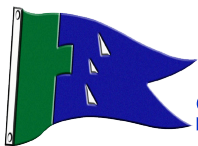

DOCK REPAIRS CONTINUE

***When you see our crew– Chris, Bert or Dolan– on the docks,
be sure to stop and say HELLO!***
